

Helmholtz E&E DataHub: products and services for time series, biodiversity and geospatial data

Wednesday 6 March 2024 10:45 (2 hours)

In this breakout session we will present the current activities of the Helmholtz E&E DataHub in general and specifically highlight the developments in community-proven workflows for the ingest, management and provision of time series, biodiversity and geospatial data. The new research data infrastructure solutions will be interactively demonstrated based on concrete scientific use-cases relevant in Topic 5.

Presenters: SCHNICKE, Thomas (UFZ); HAMMITZSCH, Martin (GFZ)

Session Classification: Breakout Sessions
