

Helmholtz AI Consulting Outreach

Monday 29 January 2024 15:00 (1h 15m)

Let's discuss outreach activities that help us finding cool voucher projects. I'd like to address individual interests of different centers as I think they are quite diverse. I'm planning to send around a survey to all consultants before the retreat to obtain an overview of the status quo. Potential questions and subtopics may be for example:

- Satisfaction with currently running voucher projects (What makes a voucher more or less interesting? Is it solely the prospect of publication?)
- Number of voucher proposals and selection criteria (Are there enough requests? Are there too many requests? How can you identify interesting projects in the beginning?)
- Goal of outreach activities for each center (Stay in your own research field? Foster collaboration between centers?)
- Different kinds of outreach activities and how to organize and execute them (roadshows, networking activities, follow-up vouchers, ...)
