

INTIMATE Colloquium 2024

Tuesday 7 May 2024 - Wednesday 8 May 2024

GFZ

Book of Abstracts

Contents

Welcome by organisers	1
Laudatio	1
Varves from maar lakes of the West Eifel Volcanic Field	1
Time-scale synchronizations of paleoclimate records from the southern Baltic realm and Black Sea	1
Reconstruction of North Atlantic atmospheric dynamics using annually-laminated sediment records	1
Postglacial lake formation and permafrost evolution in the Central European Lowland	1
Welcome and words from the GFZ Board	1
Closing & Reception	1
Precise correlation of climate records using tephra layers	2
From the natural to the cultural landscape - the path of Central European landscape transformation	2
Speleothems as windows into glacial times –Abrupt transitions and glacier evolution in the European Alps	2
Constraining the influence of oceanographic and environmental conditions on the variability of Last Interglacial Mediterranean molecular proxy-based sea surface temperature reconstructions	2
Microscale Alkenone Heterogeneity and Replicability of Ultra-High-Resolution SST Proxies in Laminated Marine Sediments	2
Large-scale atmospheric circulation changes in the northern Mediterranean realm during the Younger Dryas: new insights from Lago Grande di Monticchio (Italy)	2
Proxy-model comparisons for palaeoclimate reconstructions	2
The environmental setting of the Neolithic agricultural revolution	3
The identification of the Campanian Ignimbrite in the Dead Sea reveals time-transgressive hydroclimatic changes in the Mediterranean	3
Refining high spatial resolution trace element analysis of single-grain vitreous tephra shards by LA-ICP-MS	3

Precise dating of the 8.2 kyr event provides evidence for global climate response	3
Bipolar volcanic ice-core synchronization of the entire last glacial period	3
Authigenic $^{10}\text{Be}/^{9}\text{Be}$ -ratios in marine sediments during the Laschamps event and their use for dating of marine sediments	3
A Holocene tephrostratigraphy of the continuously varved Arctic lake Nautajärvi, Finland	3
A tribute to Svante Björck - a great scientist, colleague and INTIMATE pioneer	4
10,800-year record of spring and summer temperature variability from biochemical varves, Lake Żabińskie, Poland	4
Varve formation at Strathcona Lake, Ellesmere Island, Canada	4
Discussion & Closure	4
Ecological responses recorded by varved sediments from Holzmaar (Germany) during the Homerian Climate Anomaly	4

INTIMATE Colloquium 2024 / 3

Welcome by organisers

INTIMATE Colloquium 2024 / 4

Laudatio

INTIMATE Colloquium 2024 / 5

Varves from maar lakes of the West Eifel Volcanic Field

INTIMATE Colloquium 2024 / 6

Time-scale synchronizations of paleoclimate records from the southern Baltic realm and Black Sea

INTIMATE Colloquium 2024 / 7

Reconstruction of North Atlantic atmospheric dynamics using annually-laminated sediment records

INTIMATE Colloquium 2024 / 8

Postglacial lake formation and permafrost evolution in the Central European Lowland

INTIMATE Colloquium 2024 / 9

Welcome and words from the GFZ Board

INTIMATE Colloquium 2024 / 10

Closing & Reception

INTIMATE Colloquium 2024 / 11

Precise correlation of climate records using tephra layers

INTIMATE Colloquium 2024 / 12

From the natural to the cultural landscape - the path of Central European landscape transformation

INTIMATE Colloquium 2024 / 13

Speleothems as windows into glacial times –Abrupt transitions and glacier evolution in the European Alps

INTIMATE Colloquium 2024 / 14

Constraining the influence of oceanographic and environmental conditions on the variability of Last Interglacial Mediterranean molecular proxy-based sea surface temperature reconstructions

INTIMATE Colloquium 2024 / 15

Microscale Alkenone Heterogeneity and Replicability of Ultra-High-Resolution SST Proxies in Laminated Marine Sediments

INTIMATE Colloquium 2024 / 16

Large-scale atmospheric circulation changes in the northern Mediterranean realm during the Younger Dryas: new insights from Lago Grande di Monticchio (Italy)

INTIMATE Colloquium 2024 / 17

Proxy-model comparisons for palaeoclimate reconstructions

INTIMATE Colloquium 2024 / 18

The environmental setting of the Neolithic agricultural revolution

INTIMATE Colloquium 2024 / 20

The identification of the Campanian Ignimbrite in the Dead Sea reveals time-transgressive hydroclimatic changes in the Mediterranean

INTIMATE Colloquium 2024 / 21

Refining high spatial resolution trace element analysis of single-grain vitreous tephra shards by LA-ICP-MS

INTIMATE Colloquium 2024 / 22

Precise dating of the 8.2 kyr event provides evidence for global climate response

INTIMATE Colloquium 2024 / 23

Bipolar volcanic ice-core synchronization of the entire last glacial period

INTIMATE Colloquium 2024 / 25

Authigenic $^{10}\text{Be}/^{9}\text{Be}$ -ratios in marine sediments during the Laschamps event and their use for dating of marine sediments

INTIMATE Colloquium 2024 / 26

A Holocene tephrostratigraphy of the continuously varved Arctic lake Nautajärvi, Finland

INTIMATE Colloquium 2024 / 27

A tribute to Svante Björck - a great scientist, colleague and INTIMATE pioneer

INTIMATE Colloquium 2024 / 30

10,800-year record of spring and summer temperature variability from biochemical varves, Lake Żabińskie, Poland

INTIMATE Colloquium 2024 / 31

Varve formation at Strathcona Lake, Ellesmere Island, Canada

INTIMATE Colloquium 2024 / 32

Discussion & Closure

INTIMATE Colloquium 2024 / 37

Ecological responses recorded by varved sediments from Holzmaar (Germany) during the Homeric Climate Anomaly
