

Towards a Sustainable Bioeconomy –Resources, Utilization, Engineering and AgroEcosystems - Fall meeting Topic 7

Contribution ID: 46

Type: **not specified**

AGRASIM

Tuesday 29 October 2024 15:15 (45 minutes)

AGRASIM is a new research facility of six terrestrial ecosystem mesocosms, which allow experimental simulation of the effect of present and future environmental conditions on, amongst others, agricultural plant performance, water and greenhouse gas fluxes, and carbon and nutrient dynamics in the soil-plant-atmosphere continuum.

Presenter: Prof. BRÜGGEMANN, Nicolas (Forschungszentrum Jülich (IBG-3))

Session Classification: Lab/ Field tours
