

AutoBioTech - Automation of biotechnology

Tuesday 29 October 2024 16:00 (45 minutes)

The tour at IBG-1 will present the new technology platform AutoBioTech for automation and digitalization of microbial strain and bioprocess development. Protocols for automated cloning, transformation and identification of recombinant clones are established to speed up strain development and exploit the catalytic power of microbes for biotechnology and bioeconomy.

Presenter: Dr TENHAEF, Julia (Forschungszentrum Jülich (IBG-1))

Session Classification: Lab/ Field tours
