

# EU neutron sources: Information about the plans on user operation

- ISIS
  - Restart not before September 2020, remote experiments under consideration
  - Long break planned from 04/01/2021 until March 2022 (postponement possible due to Corona)
- ILL
  - A cycle is planned from August 2020, probably no or only a few users -> remote
  - 2021: three cycles are planned (04/02-25/03; 13/04-30/05; 15/06-02/07)
  - 2022: restart on August 23rd after a longer break. Changes are possible because of Corona!
- PSI
  - Neutron guides at SINQ have been replaced, the restart is planned for July. From 01/09 also for external users (depending on the corona situation)
  - 2021 and 2022: normal operation is planned (spring shutdown, operation May-December)
- BNC
  - From May 11<sup>th</sup> the reactor should be running with the schedule <https://www.bnc.hu/schedule>
  - Apparently only remote and/or mail-in experiments
- DUBNA
  - No user operation at the moment

# Timeline EU Neutron Sources 2018-2022

# Information on non-EU neutron sources

- J-PARC:

At the moment no user operation (eventually only for internal users).  
Further information end of May.

- ANSTO:

No user operation at the moment, but then first approved and postponed experiments.  
Travel restrictions? Mail-in experiments?  
Further information in the next weeks.

- ORNL:

Entry into the site is not allowed since 13/3 (also for US citizens).  
No user operation at the moment; maybe per remote?

- NIST:

No user operation until further notice.

# Call for proposals: deadlines

From the web-pages of the institutes. Changes are possible.

## Neutron

- ILL: 15/9/20 (?)
- PSI: 15/11/20 for experiments (probably) im May-August 2021
- ISIS: April 2021 Round 21/2 only TS2 instruments, October 2021 Round 22/1
- DUBNA: call opens in August/September 2020
  
- ANSTO: 15/9/20 for experiments (probably) im January-June 2021
- SNS: 16/9/20 (call 2021-A)

## Synchrotrons

- PETRA III: 1/9/20...further information (call open) in July
- BESSY III: 1/9/20 for experiments (probably) in February-July 2021  
1/3/21 for experiments (probably) in July- February
- MAX IV: 15/9/20 for experiments (probably) in March-August 2021
- SOLEIL: 15/9/20 for experiments (probably) in March- July 2021
- DIAMOND: 1/10/20 for experiments (probably) in April- September 2021
- SLS: 15/10/20 for experiments (probably) from January 2021
- SOLARIS: 1/10/2020
- ESRF: „Rolling Crystallography and BioSAXS: proposals will be open from 1st June 2020 for scheduling August 2020“
