

Helmholtz Spring Event

Tackling the global challenges together –
the potential of association and widening schemes

16 April 2024 · Representation of the State of Hessen to the EU
Rue Montoyer 21 – 1000 Brussels

Dear Colleagues,

Global challenges do not stop at borders – and the Framework Programme is of utmost importance to address these challenges jointly. How can we enhance cooperation between EU Member States and beyond? What is the motivation for non-EU countries to associate to the framework programme? Could widening instruments be adapted to boost their attractiveness for both widening and non-widening countries? How can research infrastructures enable and promote collaborations?

Together with experts from different fields, we will discuss what is needed to tap on the potential of the association and widening schemes.

We look forward to meeting you!
Your Helmholtz Office Brussels

We kindly ask you to register until 10 April 2024 via https://events.hifis.net/e/helmholtz_brussels
(Please note that the number of seats is limited.)
