

TEACHING WITH PODCASTING????

Peter Schmidt, November 2024

WHO IS THIS GUY?

- Trained as a *physicist* (1996)
- Worked as a *software engineer* – (well, most of the time)
- Became a *podcaster* (2020)

SO...TEACHING...

Once upon a time (2018) I started to learn...

Found teaching languages hasn't changed much

Found Podcasts

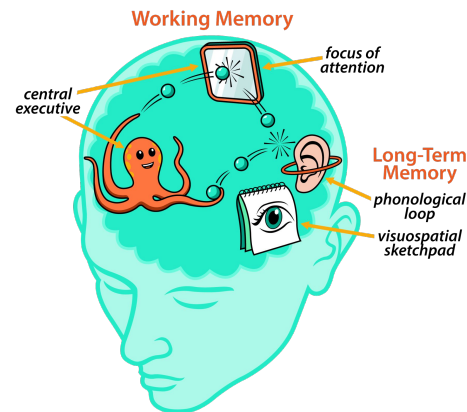

WORKING MEMORY ... LONG-TERM MEMORY

Don't overload your working memory

How to learn “beyond the exam”?

MANY ROADS LEAD TO ROME...

Different ways to learn complex content

“Wandering minds” may not be a bad thing

Different perspectives matter

BUT WOULD IT WORK IN TECH?

Audio only?

Anybody learning anything?

Isn't there enough already?

coursera

 **HELMHOLTZ**
| GEMEINSCHAFT

WHAT DO PODCASTS BRING TO THE TABLE?

Get different points of view

Get sign posts

Get it when and where you want it

WHAT IS IT THEY CAN'T DO?

Replace classes

Coding instructions/examples – audio only

Interaction between students/tutors

ENTER - BYTESIZED RSE

Launched 2022 as part of the *Universe HPC project

Short online lessons focussing on practical implementations

Each lesson is matched with a podcast episodes

NOW IN 3RD SEASON

BYTESIZED RSE EPISODES

Published 2-3 days after online class

Includes background, history, interviews (usually), quiz

Open to all listeners (part of Code for Thought)

UCL COURSE - PYTHON AND C++

Autumn term 2022: Research Software Engineering with Python

As of Jan/2025: C++ course for researchers

Follows similar concept as ByteSized RSE

EXCEPT: IS OWNED BY UCL

EXPERIENCES? LESSONS LEARNT?

Feedback? - surveys (UCL), download stats (ByteSized RSE)

Interaction? - very little, podcasts are more for consuming

Audio only? - works, but you have to think about the content & structure

Effort? - LOTS

WOULD I DO IT AGAIN? ... SHOULD YOU?

ABSOLUTELY

Podcasts can be a great **addition** to a class (alas, not a replacement)

Podcasts can make us

CURIOUS

And what better way to learn?
