Commuting

Be aware that most things in central Berlin are 20-50min away by public transport, and walking distances can vastly vary between districts. Be aware that there is no distinct "city centre", rather several hubs of activity in all parts of Berlin within and outside the Ringbahn limits.

For commuting, there are several options : city bicycles, U-Bahn, S-Bahn and RE. A lot of construction work and delays can unexpectedly occur, so do not rely only on the live timetables shown on the Google maps app. We recommend the following apps (with possibility of ticket purchase too if needed or simply for schedule updates and itinerary info) :

- DB Navigator app
- VBB app
- BVG Fahrinfo app
- S-Bahn Berlin app
