

Helmholtz Metadata Collaboration | Conference 2024

Monday 4 November 2024 - Wednesday 6 November 2024

virtual event

Topic tracks

The HMC Conference 2024 will have the following overarching topic tracks which correspond to the HMC strategic goals. All contributions are asked to assign themselves to at least one of the topic tracks, as these will form the basis for planning the individual sessions.

Assessing and monitoring FAIR data

- 1. Human actors in the FAIR data landscape**
- 2. Metrics, tools and workflows for metadata assessment**
- 3. Mapping of FAIR data infrastructures**

Connecting research data

- 4. Metadata annotation and management**
- 5. Technical solutions for findable and machine-readable metadata**
- 6. Interoperable semantics at domain and application level**
- 7. Infrastructure and common practices for consolidation of (meta)data**

From recommendations to implementations

- 8. Development of training programmes**
- 9. Consulting concepts**
- 10. Enabling and incentivising community-driven initiatives**
