## The End of RSEng? Challenges and Risks for RSEng

*Wednesday 26 February 2025 16:45 (45 minutes)*

It is certainly too early to herald the end of RSEng already, but the future is in constant flux and we should discuss how RSEng will change in response to the upcoming challenges in an open discussion.

Some questions to get the discussion started:

- How will RSE change in the face of the ongoing digitalization of society? If people are better prepared in school?
- How will AI impact our work
- What will our topics be after version control doesn't need to be taught anymore? Digitalisation will also feature more heavily in the domain curricula.
- What is in this future for RSEs?

This BoF aims to bring together people interested in reflecting on the challenges and opportunities for RSE.

### I want to participate in the youngRSE prize

no

**Primary authors:** GOTH, Florian (Universität Würzburg); Mr CHOURDAKIS, Gerasimos (University of Stuttgart); THIELE, Jan Philipp (Weierstrass Institute Berlin); Dr COHEN, Jeremy (Imperial College London); HAGDORN, Magnus Karl Moritz (Charité Universitätsmedizin Berlin); Dr BARRIOS SAZO, Maria Guadalupe (Forschungszentrum Juelich); MARTONE, Michele (Leibniz Supercomputing Centre); HODGES, Toby (The Carpentries)

**Presenter:** GOTH, Florian (Universität Würzburg)

**Session Classification:** BoFs: Challenges for RSEs

**Track Classification:** Policies and Community Building: careers for research software developers
