...data science initiatives within the Helmholtz Association

HELMHOLTZAI | ARTIFICIAL INTELLIGENCE COOPERATION UNIT

in a nutshell

@helmholtz ai

HelmholtzAl

- → Foster cross-field creativity
- → Identify & leverage similarities between applications
- → Integrate field-specific excellence
- → Improve quality, scalability and availability of emerging methods
- → Empower current & next generation of scientists

in a nutshell

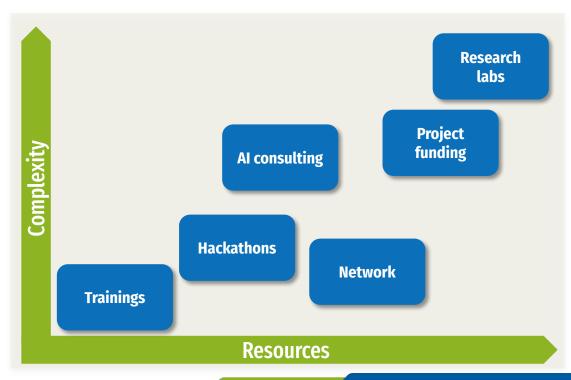

@helmholtz ai

HelmholtzAl

Maximise research impact by democratising access to Al

- → Foster cross-field creativity
- → Identify & leverage similarities between applications
- → Integrate field-specific excellence
- → Improve quality, scalability and availability of emerging methods
- → Empower current & next generation of scientists

EXPLORATION -- up to 2 weeks REALISATION -- up to 6 months

REVIEW

Formal criteria (Science management) Scientific criteria (Al consultants)

SUBMISSION

Through official online form at submission website

IDEA

Selecting, testing and implementing ML methods, knowledge transfer and networking, training and workshops, benchmark datasets...

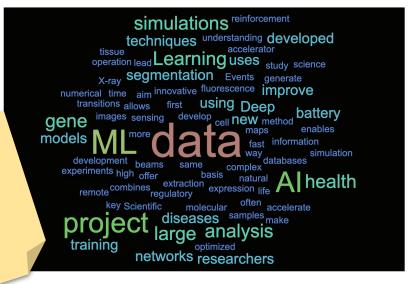

Helmholtz Al project call

Our annual call to

- help exploit machine learning/Al methods in applicants' research field
- foster method transfer between application and research fields
- encourage high-risk/high-gain approaches
- at least two centers apply jointly
- up to €200k (INF, needs to be matched)
- funding for up to 3 years

2019 call: 19 projects with >€7m 2019 call: 17 projects with >€6m 2020 call: 0PEN NOW (<1 Dec) 2021 call: 0PEN NOW (<1 Dec)

All Helmholtz Centers are involved and all research area are covered.

Helmholtz AI project call timeline

9th August 2021: call open

1st September 2021: submission portal open

1st December 2021: submission deadline

 December and early 2022: review process and selection

Spring 2022: selected projects will be announced

Outreach & proposal planning

Dedicated submission portal: https://application.helmholtz.ai

Submit proposals until end of day (CET)

Formal criteria check

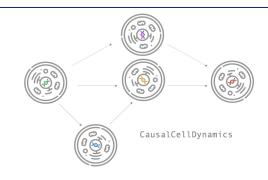

virtual panel meeting

Projects selected and starting

Helmholtz international labs cross continents to unleash the potential of AI communities working together

In the 'Helmholtz International BigBrain Analytics and Learning Laboratory' researchers from McGill University and MILA in Montreal and FZJ/Helmholtz Al in Jülich develop novel Al-based methods for analyzing high-resolution image data. They create new highly detailed maps of brain areas, cortical layers, and subcortical structures for microscopic models of the human brain.

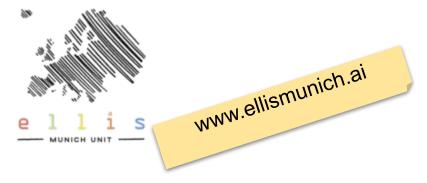

The Helmholtz International Lab 'Causal Cell Dynamics' brings together 3 sites with pioneering roles in artificial intelligence - Mila in Montreal, MPI in Tübingen and ICB + Helmholtz Al in Munich. The major aim is to develop methods for causally structured deep representation learning in order to improve our understanding of cellular decisions.

Network and collaborations

Helmholtz AI connects with the European Laboratory for Learning and Intelligent Systems (ELLIS) through its **ELLIS fellows, members** and **PhDs** and through their involvement in the **ELLIS Units Munich** and Heidelberg.

HIDA supports the mobility of several young talents and exchange scientists from abroad who are currently working jointly with Helmholtz AI researchers, e.g. two Israeli students at Helmholtz AI in Geesthacht.

Community and resources

Online since autumn 2020: The "Helmholtz Al computing resources" (HAICORE, €2.5m) provide easy, free and low-barrier GPU access to the entire Al community within the Helmholtz Association.

- Ad-hoc usage for initial testing with data and/or Al methods
- Lightweight projects of up to 10,000 GPU hours per year

HAICORE is operated by Jülich and Karlsruhe.

The 'Helmholtz AI community' workspace is a dedicated networking space for Helmholtz researchers to share information and meet other AI/ML enthusiasts, e.g. to partner up for the annual Helmholtz AI project call.

Jobs...

The German Climate Computing Centre (DKRZ) is the central data processing facility for the German climate and Earth system modeling community and is one of the leading facilities in this area. DKRZ operates supercomputers of the highest performance class, modern high-performance clusters and graphics systems as well as one of the largest data and archive systems worldwide.

For the Al Consultant team we are hiring for positions that will start as soon as possible (specific dates can be discussed individually).

ML Software Engineer & Scientific Programmer (all genders)

To improve the infrastructure for climate modelling, DKRZ participates in many national and international projects. Through its research group on Scientific Computing, DKRZ is linked to the Department of Informatics at the University of Hamburg.

The Heimholtz Association (HGF) initiated the Heimholtz Artificial Intelligence platform (https://lemholtz.al/) This future-oriented network for applied Artificial Intelligence (see purposes including the analysis of complex systems in the fields of energy, transport, climate and health. The Heimholtz Al local unit AM (Artificial Intelligence innovation for Earth System Analytics and Modelling) provides application-oriented Al capabilities for the field of Earth System and climate science, with a specific focus on Machine Learning (ML) methods. AM consists of scientific portates, including a research aroug at Heimholtz-Zentrum Hereran and a suport team of A Consultants at DREZ. The

Helmholtz Al central unit @ Helmholtz Zentrum München (HMGU):

- Helmholtz Al consultants (Health; until Sept 29, 2021)
- Senior Helmholtz Al consultants (Health; until Sept 29, 2021)
- Machine Learning Engineer for Al applications (until Sept 29, 2021)

Scientific / postdoctoral posts

Postdoc in Computational and Systems Neuroscience

O Jülich 🗒 Forschungszentrum Jülich

Scientific / postdoctoral posts

59924: Computer Scientist, Physicist or similar (f/m/x) - Anomaly detection for maritime focused detector systems

Scientific / postdoctoral posts

Research associate / PhD candidate (f/m/d) Machine learning for design of chemical engineering unit operations

Karlsruhe 📕 Karlsruhe Institute of Technology (KIT)
