Continuous Integration and Continuous Deployment at DESY

Continuous Integration and **Continuous Deployment** is a modern **Software Engineering** best practice that enables efficient *large scale* software development and use. There are a variety of popular Ci/CD *tools* that help in adopting these practices. In this poster we focus on the kinds of software, their runtime environments, packaging and deployment tools and techniques used at DESY that can easily be leveraged by participating institutions under DAPHNE4NFDI.

Primary authors: KHOKHRIAKOV, Igor (DESY); TIRUMALAI NALLAM CHAKRAVARTY, Parthasarathy (DESY); KWEE-HINZMANN, Regina

Presenter: TIRUMALAI NALLAM CHAKRAVARTY, Parthasarathy (DESY)
