

DRESDEN for AMS-17!

The Helmholtz-Zentrum Dresden-Rossendorf (HZDR) is excited to offer hosting the 17th International Conference on Accelerator Mass Spectrometry

DRESDEN — city at the heart of the European Union

- Beautiful and historic old town — one of the most visited cities in Germany
- A major hub for science and technology
- TUD Dresden University of Technology —one of Germany's 11 Universities of Excellence
- World class public transport
- Pleasant climate — wine growing area
- "Saxon Switzerland Mountains"

The **Helmholtz-Zentrum Dresden-Rossendorf** is a large research center located on the site of the former Central Institute of Nuclear Physics (est. 1956), the former GDR's largest nuclear research center. Since 2011 HZDR is part of the Helmholtz Association of German Research Centers, which includes institutes of world renown such as the GSI, DESY, AWI, GFZ, and GEOMAR.

The Department of Accelerator Mass Spectrometry and Isotope Research has been founded in 2019 to expand AMS activities at HZDR. The expansion includes a novel AMS system with the widest range of capabilities—the HAMSTER facility.

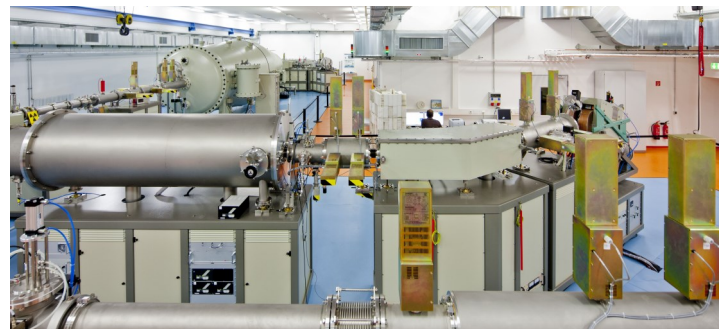

OUR PROPOSAL

VENUE: TUD Dresden University of Technology

TIME: September 2027

PROGRAM:

- 5 days regular session program and plenary sessions
- Workshops on the weekends before and after, for in-depth discussion of community topics
- Tour of the new, cutting-edge 1MV HAMSTER facility and the 6MV DREAMS facility
