# Metadata for Academic Event PIDs (EN)

*Wednesday 7 May 2025 10:20 (10 minutes)*

This presentation takes a look at how academic events are being reflected in PID registrations and what kind of metadata are provided for them, focusing on DataCite DOIs. With metadata schemata not specifically tailored to academic events, how can PID metadata still distinguish academic events from other kinds of events, and from their output? In existing PID metadata, how well documented are the connections between events and their context, contributors, output, etc.?

**Presenter:**   KRAUS, Robin (TIB)

**Session Classification:**   Einführung / Introduction
