

deRSE25 and SE25 Timetables

Tuesday 25 February 2025 - Saturday 1 March 2025

Building 30.95

Scientific Programme

Research Software

AI and ML in a research context

Cloud Technologies

Continuous Integration

Computing Architectures

infrastructures for scientific computing

high-performance computing (HPC)

digital humanities

domain-specific languages

software sustainability

research software usability

visualisations and analysis

RSE research

Policies and Community Building

careers for research software developers

policies and legal frameworks

funding for RSE work

local RSE related organisations

research software support

open source research software

Education

project planning and project management

digital literacy in research

RSE education

best practices for research software development

Data and Software Management

research data management

software management plans

software metadata

computational workflows

computational reproducibility
