Collaborative Sessions

Tuesday 4 November 2025 15:00 (1h 30m)

In several collaborative sessions (1-2-4, World Café, or similar) we look at what is already there and helpful and what shortcomings and roadblocks we face in our work as research software engineers. We also develop ideas on how to improve the situation for research software bottom-up by networking, by making better use of what is there and by identifying areas where collaborating on shared solutions might support us.

Session Classification: Workshop
