

Workshop 1: Interactions, tools and methods in online teaching

Wednesday 1 October 2025 09:00 (4 hours)

Learning objectives:

Participants can develop methods and didactic concepts for online training. They can apply principles to motivate participants and get them to interact so that learning content is actively processed.

Contents of the workshop:

The workshop provides basic didactic knowledge for online teaching and introduces methods and principles that maintain a consistently high level of learning ability among participants. Special reference is made to the 'flipped classroom' method. In addition, the 'Method Shower' section of the workshop offers the opportunity to collaboratively develop your own methods together with the other participants and interactively try out tools.

Presenter: Dr WOHNER, Patricia (Hanke Teacher Training)

Session Classification: Workshops (swapping groups)
