LLMs & AI Research Agents: scienceOS in Research Practice

Tuesday 9 September 2025 13:30 (1 hour)

ScienceOS is the AI Research Agent for researchers with high standards and limited time.

With access to over 220 million scientific documents, scienceOS provides well-founded answers with precise source references. Features such as PDF uploads, a personal library for up to 4,000 papers, and other intelligent tools make working with scientific literature faster. Complex algorithms ensure that reliable sources are prioritized.

The capabilities of scienceOS are presented through four typical challenges faced in everyday research: from quickly getting up to speed in new subject areas, to drafting and reviewing one's own texts, to targeted comparisons of publications and identifying particularly relevant sources and foundational works.

There will be plenty of time for questions and interaction with the presenters.

Presenter: DEDA, Henri Max (ScienceOS)

Session Classification: Practical Sessions
