

Workshop 4: Notebook 2.0: How to switch to ELNs in your lab

Wednesday 1 October 2025 13:30 (1h 30m)

Discover how Electronic Lab Notebooks (ELNs) enhance reproducibility, collaboration, and FAIR compliance in microbiota workflows. We will demonstrate best practices in eLabFTW - a free and open source favorite in the field - by covering its interface, metadata features, and integrations, then guide you through a hands-on exercise to create and manage a sample project. By the end, you'll be ready to implement ELNs in both wet-lab and bioinformatics settings.

Presenter: THÖLKEN, Clemens (Philipps-Universität Marburg)

Session Classification: From Lab Bench to Data Bench: Practical Research Data Management for Scientists
