

Machine Learning for Image Segmentation

Thursday 16 October 2025 10:00 (1h 30m)

The course will introduce current machine learning models for image segmentation, including semantic- and instance segmentation. It will also cover how to apply such models to large data. A respective tutorial at the end of the seminar series will give hands-on experience in training and applying such models.

Presenter: Dr KAINMÜLLER, Dagmar (MDC Berlin)
