

We are organizing a Summer School on "**Nuclear Physics in Astrophysics**" in connection to the International Conference on [Nuclear Physics in Astrophysics X](#).

Topics will cover the different aspects of Nuclear Physics and Astrophysics from **nuclear structure theory** to **nuclear ground and excited state properties** and **experimental studies**.

Highlights of the school include:

- Observation night with the [Nordic Optical Telescope](#) sponsored by [ChETEC-INFRA](#)
- Hands-on day with the galactic chemical evolution code [OMEGA](#)
- Training day for Nuclear Astrophysics Masterclasses
- Public special lecture on Nuclear Astrophysics at the [Globe of Science and Innovation](#)

Thanks to the generous support of [ChETEC-INFRA](#),  
**all local costs** (i.e., meals and accommodation) **of 20 accepted participants will be covered.**

**Registration is open until 30 June 2022!**
