

SweepMe!

- **Modular Automation Platform for Measurement & Control**
Easily combine instruments and processes to build complete automation workflows.
- **Rapid Procedure Creation – No Coding Required**
Design complex experiments and test sequences using an intuitive drag-and-drop interface.
- **Accelerate R&D and Production Testing**
Ideal for electrical characterization, material testing, device validation, and thin-film deposition.
- **Extensive Library of Ready-to-Use Instruments**
Over 250 plug-and-play drivers available - free and continuously growing.
- **Highly Customizable for Advanced Users**
Support for scripting, parameter sweeps, conditional logic, and integration with Python.

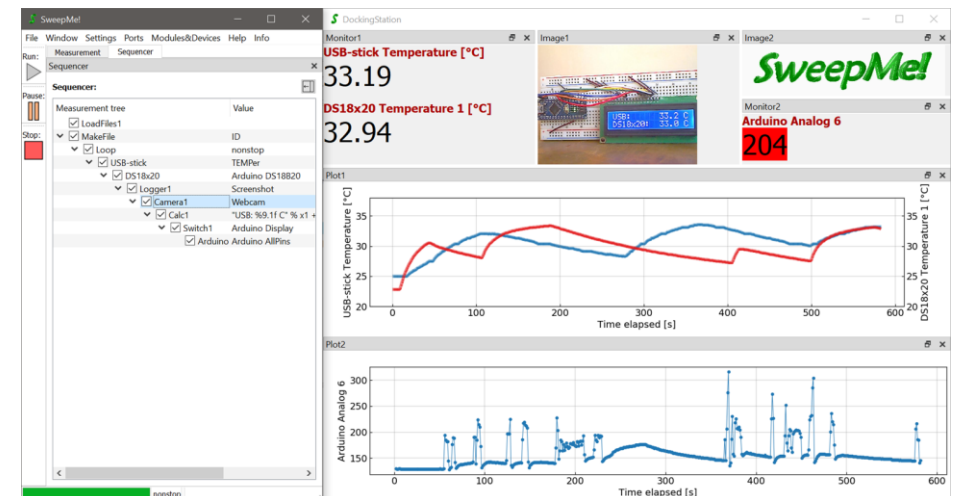

Easy combination of instruments
