

IP4-A6: Lab tour "UFZ Green Roof Research"

Wednesday 12 October 2022 14:00 (1h 30m)

During the tour, green roof research at the UFZ will be presented. Using the four green roofs (retention green roof on a carport, as well as extensive, intensive and wetland roof on the Research Green Roof), visitors will be explained how green roofs are constructed, what functions they can take on in urban areas and what contribution UFZ Green roof research makes to the development of multifunctional green roofs.
