

IP1-A2: Workshop "Advanced metadata standards for biodiversity survey and monitoring data"

Wednesday 12 October 2022 14:00 (1h 30m)

The workshop will introduce to an updated biodiversity monitoring metadata tool based on FAIR principles. It will show the importance of a "common language" using updated thesauri. Participants will learn how to use the metadata tool and have the option to further discuss the semantic artefacts with a reflection on their own projects, ideally from different realms.

Primary author: HARPKE, Alexander
