

_WTT: Workshop "Learn to solve problems creatively with DESIGN THINKING"

Thursday 13 October 2022 11:00 (1h 30m)

Design Thinking has become an extremely popular approach to problem-solving. And problem-solving is innate to any scientist! The goal of this workshop is to give you a hands-on, activity-based experience of creative problem-solving using the Design Thinking Method.

We will teach you the fundamentals and take you step by step through the entire Design Thinking process, thereby equipping you with the input you need to apply the method in your research field and come up with innovative strategies, ideas and solutions. Curious to learn more? Then join us during the Science Days!
