Intermediate: Data Science with Python (Pandas)

Wednesday 14 September 2022 09:00 (5 hours)

In this quick workshop we will get an overview over the data science framework *pandas*.

Participants should have some fundamental knowledge on how to work with Python and have a working Python-installation ready and the *pandas*-package installed.

The workshop contains a code-along introduction and a introduces a set of exercises to build some practical experience.
Instructors will be available to help with the exercises and give feedback on your solutions.

The workshop includes a 30-minute break every 90 minutes and offers the opportunity to take a lunch break at your own discretion during the exercise part (after 12:30).
