

Foundations of research software publication

Thursday 9 June 2022 10:30 (2 hours)

We will provide you with actionable advice about how to prepare your research code before publishing it or submitting it alongside a research publication.

This talk will cover the following topics:

- Code repository structuring
- Minimum coding practices
- Documentation
- Open source licensing
- Minimum software release practices
- Software citation

We will discuss these topics at the example of a data analysis script and will focus on minimum practices for every topic.

Presenter: SCHLAUCH, Tobias (DLR)

Session Classification: Workshop session
