

Breakout session 10: Interaction between the Pilot Services and other project actions

Wednesday 24 May 2023 14:00 (1h 30m)

We identified the need to offer the option for several WPs to discuss with the Pilot Services on mutual exchange on needs for data and information and thus offer this breakout session to allow focused conversations. Examples would be potential data needs directed to WP1, more background information on the offerings as well as needs of the local and regional decision makers with whom WP7 is dealing, the involvement with the GEOSS application of SAON which promotes specific Pilot Services, or the interaction with WP5 and the societal benefit analysis.

Online participation will be made possible, if desired.

Presenters: FLEMING, Andrew (UKRI-BAS); SUNDFJORD, Arild (NPI); KARCHER, Michael (AWI)

Session Classification: GA Day 2
