

## Breakout session 14: Arctic PASSION synthesis

*Wednesday 24 May 2023 16:00 (1h 30m)*

In Arctic PASSION WP8 comprises a number of overarching themes we deal with in the project. It shall create outputs that integrate and synthesize our project results from the different WPs. It is also meant to develop an Implementation Strategy for an improved Arctic Observing System of Systems (dubbed 'roadmap' in the DoA). We have started to develop a skeleton for such a strategy which lists relevant themes that need to be tackled. The skeleton is meant to be filled with input from Arctic PASSION actions but also necessary input from the other initiatives or projects over the remaining 2 years of Arctic PASSION.

In the session we want to present and discuss our current skeleton for the Implementation Strategy. The goal is to come out of the General Assembly with an agreed framework of topics and identified input streams, ideally also caretakers for each of the chapters/themes. All Arctic PASSION partners, collaborators and participating guests are welcome to join this session.

We will gather ideas and suggestions to each of the themes on this padlet, please contribute:
