

7th BigBrain Workshop: Challenges of big data integration

Friday 6 October 2023

Contributed Talks 3 (11:30 - 12:30)

time	[id] title	presenter
11:30	[4] The brainstem perspective on cortical functional connectivity	HANSEN, Justine
11:42	[18] Intracortical microstructural asymmetry in the human cortex: laminar differentiation, organization, heritability, and relevance to language function and psychopathological traits	WAN, Bin
11:54	[19] Whole-brain dynamical modeling of the adolescent developing brain	SABERI, Amin
12:06	[13] Align with the NMIND Consortium for better brain imaging	KIAR, Gregory
12:18	[8] SynthEco: A digital system for analyzing the brain-to-society mechanisms of lifecourse human behavior in its multi-layered and dynamic environment and its mental health and well-being consequences	GIESCHEN, Antonia
