

## **Lab tour "Biotechnikum: BioTECHNOLOGY for everyone –equipment, components, functionality and benefit" - 1st tour**

*Thursday 2 November 2023 09:30 (45 minutes)*

This guided tour takes you through the biotechnical centre and showcases modern technologies such as bioreactors and separation systems. It enables you to consider new opportunities for producing bio-chemicals from various residues and by-products, illustrating the practical application of research and its role in achieving a circular economy. We will offer explanations of simplified processes and welcome your questions, ideas and concerns.

**Presenters:** HUNGER, Steffi; AURICH, Andreas

**Session Classification:** Breakout Session
