

# NEW MASTERCLASSES FOR NUCLEAR ASTROPHYSICS

***Hannes Nitsche (TU Dresden)***

*Uta Bilow (TU Dresden), Daniel Bemmerer (HZDR)*

*This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 101008324*

# WHAT ARE WE WORKING ON?

- Development of two Nuclear Astrophysics Masterclasses
  - one-day outreach events for high school students, introducing them to modern research
  - First masterclass materials available @ [mc.chetec-infra.eu/](https://mc.chetec-infra.eu/)
  - Second masterclass currently in development
- Languages
  - **Finished: German, English, Italian, French, Czech, Bulgarian, Upper Sorbian**
  - Not finished: Spanish, Romanian, Swedish, Hungarian, Lithuanian, Catalan, Hebrew, Welsh

# CONTENT & MATERIALS

- **Centerpiece** of the masterclass:  
Analysis & evaluation of a **nuclear physics experiment**
- Measurement carried out at the  
Felsenkeller underground ion accelerator lab
- **Tasks** of the learners:
  - Gamma spectroscopy & peak measurements
  - Usage of a term diagram, consideration of background
  - Determination of the cross section & reaction rate
- **Goals:**
  - Working as a nuclear physicist for one day
  - Gain an insight into the laboratory and the working methods of a nuclear physicist

## Data Analysis

Following, you can analyze the measurement data of an nuclear reaction. The series of measurements were taken in 2021 in the Felsenkeller laboratory in Dresden. In the experiment, an N-14 (Nitrogen) target was irradiated with helium nuclei. The gamma spectrum of the resulting F-18 nucleus (Fluorine) can be viewed here.

### 1. Choose the interval

Photon energies from 0 to 16300 keV were measured. Choose the energy range in which you want to analyze the spectrum.

Minimum	<input type="text" value="2700"/>	keV
Maximum	<input type="text" value="4000"/>	keV

### 2. Choose the Measurement series

Several series of Measurements were carried out. Here you can choose between four exemplary runs.

<input type="button" value="RUN 1"/>	<input type="button" value="RUN 2"/>	<input type="button" value="RUN 3"/>	<input type="button" value="RUN 4"/>
--------------------------------------	--------------------------------------	--------------------------------------	--------------------------------------

*Data Analysis Webtool*

# CONTENT & MATERIALS

- **Various Lectures** linking the activities
- **Videos & Visualizations**
  - Camera tour through the Felsenkeller underground laboratory
  - Astronuclear Nibbles – Video series
  - Interactive Nuclide Chart

*Felsenkeller Laboratory*

Astronuclear Nibbles:

<https://youtu.be/L6NMurf64-4>

# CONTENT & MATERIALS

- **Various Lectures** linking the activities
- **Videos & Visualizations**
- **Multiple Activities** with gamification elements, e.g. ...
  - Collaboratively create a Hertzsprung–Russell diagram together

# CONTENT & MATERIALS

- **Various Lectures** linking the activities
- **Videos & Visualizations**
- **Multiple Activities** with gamification elements, e.g. ...
  - Collaboratively create a Hertzsprung–Russell diagram together
  - The Nuclei Race: Recreating s- and r-processes in a board game

# CONTENT & MATERIALS

## Two different Masterclasses

- Access to nuclear astrophysics from different points of view
- No necessity to visit the first Masterclass to understand the second
- Two independent Masterclasses
  - Each scientist can choose their preferred topic

### 1. MASTERCLASS

Nuclear Physics  
Experiments

### NUCLEAR ASTROPHYSICS

### 2. MASTERCLASS

Astronomical  
Observations

# CONTENT & MATERIALS

## Second Masterclass

- Currently under development
- Stellar spectroscopy as the central data analysis  
[\*Stellar Analysis Pipeline\*](#) by Johannes Puschnig
- Cosmological lithium problem & primordial nucleosynthesis as main themes
- Focus on addressing cosmological problems with the help of nuclear astrophysics (*big bang models via primordial Nucleosynthesis*)

### 1. MASTERCLASS

Nuclear Physics  
Experiments

### NUCLEAR ASTROPHYSICS

### 2. MASTERCLASS

Astronomical  
Observations

# MASTERCLASS EVENTS

- **Masterclass Run Throughs**
  - @ schools and school Labs in Germany
  - with high school students between the age of 14 and 18 Yrs

# MASTERCLASS EVENTS

- **Masterclass Run Throughs**
- **Masterclass Training Day**
  - @ NPA-X Summer School
  - 1 week PhD School on Nuclear Astrophysics @ CERN
  - 1 day for outreach training
    - Introduction of PhD students to masterclass
    - Motivation for outreach
    - Discussion on science communication in nuclear astrophysics

# MASTERCLASS EVENTS

- **Masterclass Run Throughs**
- **Masterclass Training Day**
- **Upcoming: ChINOS Summer School**
  - ChETEC Observational School, 24.07. - 28.07.  
@ Ondrejov Observatory, Prague

# CALL TO ACTION

## We are looking for:

**Scientists** who want to give nuclear astrophysics masterclasses

- Anyone who works in this field, can be an **Facilitator**
- **Open Access Teaching Materials** including presentation & masterclass guide

## Translations

- Finishing of the translations of the first masterclass
- Translators for the second masterclass

## Why you should engage here:

- Satisfy curiosity and spark **interest**
- **Inspire** the next generation of scientists, gain new talents
- **Personal benefit:** Self effectiveness as a scientist, active role in shaping society, communication training

**WIN-WIN**

Masterclass can be found online @
