

Hands-on Workshop metabarcoding

Thursday 8 June 2023 13:00 (2 hours)

Implementation of a DNA metabarcoding pipeline using obitools4

OBITools have been around for over 15 years. OBITools4 is their latest version, with a considerable improvement in terms of computational efficiency and ease of installation. During this tutorial, based on the analysis of a toy dataset, we will review the principles behind OBITools, the main algorithms they implement, their advantages and disadvantages.

This workshop is recommended for students and early PhDs.

Presenter: COISSAC, Eric
