

# Learning is an essential part of every scientific endeavour.

For the Helmholtz Association, as one of the leading research organizations in Europe, it is therefore key to provide and design structures, processes and opportunities for learning in the context of research and beyond.

Many dedicated teachers, educators, trainers, and professionals are active in different domains in our centers. Their important work contributes to this crucial task.

I fully support TEACH in offering them the opportunity to exchange their experience across research centers and areas of expertise, to network, and to develop new ideas on how to create sustainable learning environments and processes at Helmholtz.

I wish all the organizers, contributors, and participants an inspiring event and a lively exchange.

Otmar D. Wiestler  
President of the Helmholtz Association
