

Zeitgeist - An Interactive FAIR-Data Publishing System for Time-Series Data

Andreas Schmidt, Mohamad Anis Koubaa, Jan Schweikert, Karl-Uwe Stucky, Wolfgang Süß

- Tool to perform the export of time series data stored in an InfluxDB via a HTTP(S) GET call
- Interactive configuration of data to be exported
- Allows the specification of
 - time interval
 - restrictions on tag keys and values
 - output format (CSV or RO-Crate).
- Result of configuration is an URL, specifying the data to export
- No authentication to InfluxDB necessary (access information provided by internal configuration-file)
- Implementation aspects:
 - Apache Webserver with PHP scripts
 - Stream based approach (no restriction on data size)
