

# The NFDI4Earth distributed user support network

*Friday 5 April 2024 11:15 (15 minutes)*

The distributed, cross-institutional User Support Network (USN) for NFDI4Earth is based on the existing and well embedded user support structures of the participating institutions. The USN serves as a single point of contact for user requests that could not be handled via OneStop4All and require individual consulting. By combining the distributed RDM knowledge of experts in the USN in conjunction with the Knowledge Hub, the NFDI4Earth team will convey the notion (knowledge) of a best practice for dealing with data and how data can be made FAIRer and open.

We will present the current status and the connection to D.A.M and DataHUB.
