

Open Tools for Technology Transfer: Technology transfer and open science interaction | Business models for sustainable Open source projects | Open vs Proprietary mapping for impact maximization

Tuesday 21 November 2023 16:25 (15 minutes)

The OpenTransfer project was created to develop a new OPEN toolkit for Technology Transfer Offices. It aims to develop new approaches to industry interaction based on open science ideas.

Open has different flavours, and OpenTransfer aims to define and exploit them to maximize the impact of scientific results.

The major topics are:

- Business models based on Open IP
- Decision-making support in the context of open licencing
- Legal and Export control issuers
