Getting up and Running with your first CI Pipeline

Wednesday, March 6, 2024 9:00 AM (1 hour)

This is a tutorial aimed at absolute beginners that tries to get people started with their first CI pipeline. This is a skill-up session. We will use gitlab try to get a linter working on a python script. The workshop will utilize a carpentries style such that everyone leaves with a working CI example. This workshop is part of the "A day of CI" track.
