Community Feedback session for de-RSE position paper "Establishing RSE departments in German research institutions"

Wednesday, March 6, 2024 10:30 AM (1h 30m)

A working group of de-RSE e.V. is currently writing a position paper on "Establishing RSE departments in German research institutions". According to the timeline of the working group, a preprint version of this position paper will be available for de-RSE24. The paper is intended for adoption as an official position of the de-RSE association. Following up on successful community interactions at de-RSE23 in Paderborn and the de-RSE Unconference 2023 in Jena, we intend to use the conference to collect feedback for the community approval process of the position paper. After the feedback from the conference meet-up and the open online review is incorporated, we aim for a swift adoption and publication procedure for the position paper.

Slot length

Workshop (1h)

Primary authors: KEMPF, Dominic (Scientific Software Center, Heidelberg University); LÖFFLER, Frank (Universität Jena)

Presenter: KEMPF, Dominic (Scientific Software Center, Heidelberg University)
