Keynote 2: It takes a village: building paths between Open Science, Reproducibility and Research Software Engineering

Thursday 16 November 2023 09:40 (30 minutes)

Science has acknowledged in many disciplines it needs to be more "open" and "reproducible". But what it actually means and how to get there is yet mostly uncharted territory. This talk will introduce you to the HELIO model of Open Science, outline how documentation is key to both goals and why research software engineering is now more important than ever before.

Presenter: BERTUCH, Oliver (Forschungszentrum Jülich)

Session Classification: Opening
