

Workshop 2: Statistical and Computational Reproducibility: Experiences of a Statistical Consultant

Thursday 16 November 2023 10:30 (2 hours)

In this interactive workshop, we will delve into the intricacies of enhancing research reproducibility. Drawing upon our collective expertise as statistical consultants, we will combine theoretical discourse with practical experiences, fostering a comprehensive understanding of technical, statistical, and computational facets of reproducibility. Engaging discussions will provide a platform for sharing experiences and expectations in this domain. Live demonstrations featuring tools such as RMarkdown and Git will introduce attendees to the essential resources required to advance their research reproducibility practices.

Requirements: Basic knowledge in statistics (hypothesis testing/linear regression) and programming is advantageous.

Presenter: KHOWAJA, Kainat (Helmholtz Munich)

Session Classification: Workshops
